

Innovations Build Brandon's Awards Haul

Brandon Medical acquired the award-winning habit some years ago, but 2008 has produced a bumper crop of accolades for the innovative Leeds-based healthcare equipment manufacturer.

In a busy year, Brandon has already brought five innovation awards back to the city and nominations are still live for two further presentations.

To date, the honours board for 2008 comprises:

- National Medilink UK Innovation Award – for the Symposia medical AV systems
- Yorkshire Forward Innovator 08 Collaborative Innovation Award (Symposia)
- Yorkshire Forward Innovator 08 Technology Innovation Award (HD-LED lighting)
- Innovation & Design Excellence Awards (iDEA): Best Small Company & Breakthrough Product (HD-LED again)

Brandon Medical managing director Graeme Hall said: “While these are by no means our first awards, it has been a particularly rewarding year for what we regard as a great Leeds Manufacturing success story, especially as these accolades have been gained with the help of Leeds City Council, Yorkshire Forward and our local Manufacturing Advisory Service.”
